EDUCATION

University of Guelph

Guelph, ON

B.Eng. in Computer Engineering | GPA: **3.8/4.0**

Expected Graduation: May 2028

- **Courses:** Data Structures, Operating Systems, Computer Networks, Machine Learning, Digital Systems, Algorithms
- **Awards:** President Scholars 1/6 (\$42,500), Professional Engineers Foundation (\$1,500), Kaled Salih (\$1,000)

EXPERIENCE

Extrada Tech Ltd.

Toronto, ON

Software & Cloud Consultant

Jan 2026 - Sept 2026

- Integrated **4** CRM APIs into Fabric via PySpark ETL pipelines, automating **500K+** records for **33** brands
- Engineered Dataflow Gen2 pipelines across **3** lakehouses, reshaping **192-column** field service datasets for Power BI
- Integrated Azure AI Foundry with vector RAG, content guardrails, and safety evaluations across **6** document formats to deploy a production AI legal assistant to Azure Web Apps via GitHub Actions, cutting legal research time by **60%**
- Designed a Copilot Studio agent on Teams to auto-generate **9-section** structured client reports via Power Automate, cutting consultant report generation from **3 hours** to under **15 minutes** per client visit across all active engagements
- Built an Azure Data Factory pipeline transforming **42K+** rows across **5** stages with automated SFTP export

Robotics Institute

Guelph, ON

Simulation & Computer Vision Engineer

May 2025 - Sept 2025

- Built dual-camera RealSense + OpenCV vision system achieving **<1cm** 3D localization across **2** sensors, enabling precise robot arm targeting for autonomous strawberry pick-and-place across varying tomato crop geometries
- Engineered real-to-sim pipeline with Hough circle detection for RGB/depth-to-MuJoCo STL conversion, achieving **35%** faster scene processing and **20%** improvement in robot arm pick-and-place planning accuracy

University of Guelph

Guelph, ON

AI/ML Research Assistant

Sept 2024 - May 2025

- Optimized YOLOv9 via YOLO Tune, increasing strawberry detection IoU by **12%** and cutting labeling time by **200%**
- Authored **40-page** ML research report and lab manual, onboarding **3** researchers and building reusable pipeline docs

Robotics Institute

Guelph, ON

Machine Learning Developer

May 2024 - Sept 2024

- Led full ML pipeline for a YOLOv9 harvesting robot, annotating **970** images to GPU training via CUDA, with an F1 of **0.88**
- Developed 2-stage approach combining instance segmentation with HSV color analysis, classifying **5** ripeness classes
- Deployed the model on a ROS2 robotic system with real-time inference for autonomous pick-and-place operations

PROJECTS

ProxyCoach AI | Live Production AI Fitness Coach · 50+ Active Users

[Website Link](#)

- Architected a multi-tenant Next.js platform gating **10+** YMCA trainers behind @ytr.ymca.ca Entra ID SSO and onboarding **50+** clients via PT-issued Microsoft Graph B2B invitations, with per-trainer knowledge bases scoped to individual clients
- Cut unsafe coaching responses to **0** by enforcing a **38-term** guardrail intercepting every prompt across **3** RAG agents on Azure AI Foundry, writing blocked queries with full context to a Neon Postgres audit table for trainer review
- Automated trainer document ingestion in under **30s** by chaining Blob Storage uploads to an Azure Function extracting PDF, Word, Excel, and CSV text and indexing it into the trainer's isolated AI Search index

ClientOps MCP | MCP Server on Azure Functions

[Github Link](#)

- Built an MCP server via Azure Functions mcpToolTrigger bindings, provisioning Linear projects, SharePoint sites, and TrackingTime workspaces across **3** services, delivering a fully configured client environment across **3** platforms in one shot
- Registered as a live Claude.ai MCP connector, cutting per-client onboarding from **2hrs** to under **2min** by replacing manual multi-tool coordination with a single prompt
- Scripted full infrastructure deployment via Azure CLI and PowerShell, provisioning **6** Key Vault secrets, Function App bindings, and storage resources in a single repeatable script, enabling any developer to spin up the full stack with **0** manual portal steps

TECHNICAL SKILLS

Languages: Python, C/C++, TypeScript, JavaScript, Java, SQL, Bash

Cloud & DevOps: Azure (AI Foundry, Microsoft Fabric, Data Factory, Azure Functions, Key Vault, AI Search, Blob Storage, Entra ID, Event Grid), Copilot Studio, Power Automate, Docker, GitHub Actions, CI/CD, Linux

Data & Databases: PostgreSQL, MySQL, Delta Lake, PySpark, Power BI, Prisma

Frameworks & Tools: OpenCV, Open3D, ROS2, MuJoCo, PyTorch, TensorFlow, NumPy, Pandas, scikit-learn, MCP, Git
